

GREAT ACERBIS NEWS: THE BODY ARMOUR FOR LADIES

Hey you, women, we have some great news for you!
Whether you are an enduro or motocross enthusiast, Acerbis thought about you by developing the innovative BODY ARMOR DNA TT, the harness with shapes and sizes designed for ladies.

The keywords are protection, resistance, ventilation and fit.

The Body Armor DNA TT, composed of three viscoelastic layers and an outer shell in semi-rigid bio-foam, guarantees the highest level of protection for the chest and back (1621 Level 2). The large areas free from fabric ensure high breathability even at the highest temperatures.

Adjustments with Velcro and elastic bands allow you to adapt the body armour to different body sizes and heights from 1.50 m to 1.80 m!

COLOURS

Black/Violet
